The single variable with the highest and most enduring effect size on student success and achievement is skillful teaching. Instructional leadership is key in promoting the highest quality outcomes for students, yet how much support is provided for principals and instructional coaches to do this important work with high efficacy. Instructional Coaching and Feedback Labs maximize instructional leadership by enhancing the ability of school leaders to recognize and develop skillful instruction. When instructional leadership is modeled, coached, and developed over time, you build long-term impactful skills. It’s “Game-Changing!” Oftentimes, the solution to instructional coaching needs isn’t just hiring more staff. Developing the skills of those you have to do this work well can actually be a cost-effective model in the long run!

**COST:**
$1,500 PER PERSON, MATERIALS INCLUDED
All payments made to the Miami County ESC

To reserve spaces, please contact Candice Sears at candice.sears@mcesc.org
