WHAT'S NEW IN WORK

The Dayton Daily News held a Community Conversation on Wednesday to discuss COVID's effects on the development of children. The discussion was co-hosted by community impact editor Nick Hrkman and Health Centers of Greater Dayton. Community Conversations are moderate panel discussions on topics important to the Dayton region. You can read the highlights of the discussion below.

Could you talk about some of the long-term consequences for both kids who have had COVID and those who haven't?

Lambes: As a physician, I've been going through other remote immigration experiences, too. There is a beginning of the pandemic when a lot of folks were trying to get to the safe places, they're not having to get those vaccines, the child's developing. It's not like we can go back to that. We need to get them to a vaccination, scheduling. I know how hard those weekends are, and how many triple-hub, triple-place kids have to get their health care, we need to get them to school, school health care.

Are any of the initiatives in the area focused on tackling the consequences for that is reactivation, not just for those kids, how do we need to plan for that?

Lambes: I know Public Health officials are reaching out to us, I know we have many schools doing walk-in vaccination clin-
